Professional Experience

SNL Financial

Software Developer II

Charlottesville, VA

June 2006 – Present

At SNL, I use a variety of technologies to develop and maintain high-traffic web applications that gather, manipulate, and ultimately display financial data in several various formats. I hold a high level of responsibility and I'm required to perform well alone or as part of a group.

Liberty University

Systems Tester

Lynchburg, VA

September 2005 – June 2006

At Liberty University, I maintained and developed web applications and reports in use by faculty, staff, and students. I was also part of the group responsible for testing and coordinating deployment of new or modified applications.
